Module #2: Safety of LNG Handling on Plant, Bunkering Station, and On-Board Vessels

Course Overview:

This course will cover all aspects of the necessary procedures to assure safe and efficient handling of LNG under a wide variety of circumstances and to initiate an appropriate response in case of emergencies.

This module is giving an opportunity to crew working onboard and personnel working ashore on LNG facilities in addition to the graduates of relevant fields

The course gives participants a unique opportunity to interact directly with experienced technicians and authorities on fire fighting, safety and security, specifically taking advantage of the first LNG practical training course in Europe.

Course attendees:

Course is prepared for professionals and/or post-graduate students, from variety of backgrounds, interested in enhancing their knowledge in the field of safety for LNG bunkering and emergency procedures.
